

MEMORANDUM FOR: Director of Central Intelligence

VIA: Deputy Director of Central Intelligence
Executive Director
General Counsel
Comptroller

FROM: Harry E. Fitzwater
Deputy Director for Administration

SUBJECT: Request for Approval for New Electrical
Power Feeders and Rerouting of New Chilled
Water and Steam Lines at Headquarters

1. A requirement exists to expedite construction of reliable utilities connections between the Headquarters Building and the power plant.

2. Should this work not be undertaken quickly, the schedule for constructing the new building could be delayed and the Agency's operational posture could be subjected to several critical utility outages during the new construction.

3. Funds to accomplish this work are estimated at not more than \$2,250,000 and are available within the Office of Logistics' budget. A request for reprogramming of \$1,650,000 had been requested from the Comptroller.

4. It is requested that the expedient construction of new electrical feeders and rerouting of other utility lines presently under contract be approved and that the attached certificate of operational necessity be signed to allow the General Services Administration to take the steps necessary to meet schedules associated with construction of the new building.

Harry E. Fitzwater

"Certificate"

This is to certify that funds for the construction of a full utilities service between the Headquarters Building and the power plant at the CIA Headquarters Building, McLean, Virginia, may be expended pursuant to the provisions of Section 8 of the CIA Act of 1949, as amended (50 U.S.C. 403j), and are authorized to be expended to carry out its functions, notwithstanding any other provisions of law. Accordingly, the work to be performed is not subject to the provision of Section 7 of the Public Buildings Act of 1959 (40 U.S.C. 606).
